COLD WINTERS – GREAT HARDWOODS

We are waiting for spring and for the new cycle to begin. All the hardwoods will begin to bud and the oaks, maples, and cherry will become alive again. Our responsibility is to harvest them respectfully and let our artisan and craftsmen create some of the finest wood working environments in the country. We are proud of what we do and would like you to take a few minutes to browse through some of our projects from the last year.
